

GRESNET PLUS

Very concentrated acid for cleaning swimming-pools after the winter period.

what can I expect of GRESNET PLUS?

- ◆ GRESNET PLUS is a very strong acid suitable for cleaning the whitish efflorescence on exterior visible brick facades.
- ◆ GRESNET PLUS is more powerful than GRESNET. GRESNET PLUS reaches where GRESNET does not.
- ◆ Before using GRESNET PLUS, first protect all the surfaces or objects which could be damaged by splashes or acid vapours.

WARNING

GRESNET PLUS must not be applied:

- ◆ On marble, calcareous stones or their derivatives.
- ◆ Without taking all possible personal precautions: gloves, protective glasses etc.

CONSUMPTION:

Of GRESNET PLUS: 0.05 l./m²
(depending on the degree of dirtiness and the number of applications)

INSTRUCTIONS FOR USE:

1

It is advisable to mix GRESNET PLUS with water for this type of application. Otherwise the effect will be very aggressive.

2

Apply the diluted GRESNET PLUS directly onto the mildew in the swimming-pool and rub with Scotch-Brite or similar.

3

Once clean, rinse with abundant water and go over the facing once again with a sponge.
